NEWS RELEASE

LR-260 Rifle

A Long-Range Competition Shooter's Dream

Long-range competition shooters asked DPMS to develop a rifle that gave them the accuracy and reliability of other DPMS rifles but chambered in .260 cal. and DPMS has done just that with the LR-260. This new rifle features a 24" stainless steel bull barrel, a 1x8 twist and the reliability and accuracy DPMS riles are known for and what long-range competitors expect. The extruded 6066-T6 aluminum A3-style flattop upper receiver, complete with a dust cover, a forward assist/shell deflector that has been machined as one unit, and a Picatinny rail for easy scope mounting all feature the hard coat anodizing and Teflon coating customary to all DPMS rifles. A ribbed, aluminum free float tube and a chromium plated steel bolt carrier, and a Koelbl single rail gas block for additional iron sights complete the LR-260's upper assembly. The LR-260's lower assembly, built on the tack-driving LR-308 platform, features the hard coat anodized and Teflon coated black, milled 6061-T6 aluminum lower receiver with a semi-auto trigger, an integral trigger guard and an aluminum magazine release button. A standard Mil Spec A2 buttstock with a trap door assembly completes this new DPMS rifle. Additional specs include the rifle's weight when empty at 11.3 lbs and measures 43.6" OAL.

Available now, the LR-260 (RFLR-260) will retail for $1199.00.

DPMS is an industry leader in providing quality AR-style rifles, components and accessories. No other company offers more styles or configurations of AR rifles. DPMS also provides choices for high-power and small-bore shooters by offering several rifles chambered in .204 Ruger, .22LR, .223 Remington/5.56x45mm, 7.62x39mm, 6.8x43mm SPC, .243 Winchester, .308 Winchester, .260 Remington and .300 Remington SAUM.
